

STEEL LOUVRE METAL AWNINGS

— FIXED & ADJUSTABLE

Australian-made Tru-steel Louvre Awnings provide excellent protection from the elements, providing one of the best ways of keeping your home cool in summer. In fact CSIRO tests prove that this style of awning can deflect up to 90% of the heat normally transmitted through a window.

Constructed from curved steel panels, Tru-steel Louvres are rigid and corrosion resistant to endure Australia's harsh conditions. The adjustable model allows you the luxury of effortlessly controlling the amount of light, heat and privacy you require, by manually adjusting the louvre panels.

Features & Benefits

- **Protection from the elements:** Tru-steel Louvre Awnings provide protection from the sun, wind and rain keeping your house cool in the summer and warm in the winter.
- **Easy panel replacement:** Should any of the panels become damaged, the design provides for easy panel replacement without removing the awning.
- **Three variations:** You can choose from standard open pitch, closed pitch or adjustable louvres with internal or external controls.
- **Extensive colour range:** With our large range of Tru-steel colours to choose from and the ability to mix and match panels, you can create a unique look for your home.
- **Complete weather protection:** No eaves? Tru-steel Louvre Awning top covers are available for complete weather protection for your windows.
